

## „GAP Tech“ mounting elements

Do you use elements similar to those in the photo? Thanks to new technology, we will produce them for you faster, cheaper and more ecologically. This technology practically eliminates material waste, which optimizes costs, especially in the case of advanced technical tapes such as ACX or VHB.

### Example applications - mounting:

- car door seals
- lid handles
- plastic elements
- dashboard elements
- car mirrors

### Advantages of our solutions

- Technology meets the strict requirements for cutting tolerances in the Automotive sector
- Ability to use a fingerlift / pulltab for easy assembly
- We process the most popular materials such as: VHB or ACX
- Flexible selection of fingerlift width without significant impact on the final price.
- More economical solution
- Reduced waste

### Solutions recommended for:

- Automotive sector
- Household appliances industry
- Plastic manufacturers
- HVAC industry
- Industrial sector in general

### Our material suppliers:

- Nitto
- Saint Gobain
- Avery Dennison
- Tesa
- 3M
